SUMMARY

I'm a backend developer with 1 year of experience in C#.NET technologies, with good knowledge of Object-Oriented Programming, Data Design, and Design Patterns
I am passionate about exploring and applying new technologies to solve real-world problems. I am a self-disciplined and highly responsible individual.

TECHNICAL SKILLS

Programming Languages:
-   C#.NET, JavaScript, TypeScript

Frameworks/Platforms:
-   ASP.NET MVC, MAUI, Web API
-   Node.js, Expressjs
-   Entity Framework

Database Management Systems:
-   MS SQL Server, MySQL

Others:
-   Strong understanding of OOP, SOLID principles, Design Patterns
-   Experience with Agile and Scrum development process

Version Control:
-   Git, Github

Foreign Languages:
-   English (Fluent)

Soft Skills:
-   Teamwork
-   Problem-Solving
-   Communication

EDUCATION

FPT University Ho Chi Minh (Vietnam) From 09/2022 - 12/2025
-   Studying Software Engineering
-   GPA: 3.0/4.0

INTERNSHIP EXPERIENCE

Backend Developer Intern - FPT Software   *(09/2024 - 12/2024)*
-   Developed **RESTful APIs** for managing online courses (creation, enrollment, progress tracking) using **C# .NET** and **MS SQL Server**.
-   Implemented authentication and role-based authorisation, and collaborated with the frontend team under **Agile Scrum** to ensure smooth API integration.

PROJECTS

Microservices POS System *(07/2025 - now)*
Github: https://github.com/xbensieve/SmartPOS.Service
- Developed a modular, scalable Point of Sale backend using .NET with microservice architecture in C#.
- Designed core services for inventory, sales, user authentication, and payment handling—each as an independent module to enable flexibility and scalability.
- Ensured maintainability and deployment ease by leveraging Docker containers for each service.

Smart Hotel Booking Management API *(06/2025 - 08/2025)*
Github: https://github.com/xbensieve/smart-hotel-booking
- Developed a RESTful backend API in C# (.NET) for managing hotels, rooms, bookings, payments, and revenue reports for both admin and user roles.
- Designed clean architecture with separated layers (API, Application, Domain, Infrastructure) and included testing modules to ensure code quality.
- Integrated VNPAY for secure online payments and Firebase Authentication for user identity management.
- Containerised the application using Docker for streamlined deployment.

Dressify E-Commerce Backend API *(03/2025 - 07/2025)*
Github: https://github.com/xbensieve/dressify-webapp-api
- Developed RESTful API and WebSocket server for an online clothing store using Node.js, Express, MongoDB, Redis, Cloudinary, VNPAY, Google OAuth, and JWT.
- Implemented user authentication & authorisation, product management, cart & order processing, payment gateway integration, and AI chatbot.
- Applied security best practices (Helmet, CORS, rate limiting, bcrypt) to ensure safe and reliable operations.

PASTIMES AND ACTIVITIES

- I enjoy reading IT blogs, such as Medium and Quora, in my free time.
- I actively follow trending repositories on GitHub and regularly practice algorithm challenges on LeetCode to improve problem-solving skills and stay updated with emerging technologies.
- In my free time, I also develop some pet projects.
